Answering Essay Questions

- Exam essay questions are often similar to the topics in the Learning Objectives and the Discussion Forum topics.
- You should have a general understanding of these topics from reading the assigned materials or listening to any online lectures or audios for a particular unit.
- There is not a specific length requirement for the essay questions on the exams, but a good essay response should be a minimum of three (3) paragraphs.
- Of course the most important thing in writing an essay question response is to make sure you answer the question.
- Some essay questions may be two or three part questions, so make sure to address each part of the question in your response.
