Physician Query Policy Assignment

Please reference the article from AHIMA – *Managing an Effective Query Process*. And refer to the *Guidelines for Achieving a Compliant Query Practice* shown in the “Reading: Handout(s)” area in this learning unit.

In the case study (2-12) there are two figures provided, figure 2-1 (Policy and Procedure) and 2-2 (Query Form). Review the AHIMA articles regarding the Query Process and using the information gleaned from the articles, review the two figures for appropriateness.

This case study has six bulleted elements you are supposed to review. It might be best to put this in some kind of table to ensure you include each of those elements. You do not need to recreate any of the tables, just evaluate. When you are finished, submit the review in the location provided.
