**Introduction to Final Project**

**Due Dates:**

LU08: Proposal Due via MyHills

LU08: Create a Turnitin.com account and enroll in the course

LU11: Final Project Paper due on Turnitin.com

**Proposal Information**

At minimum, the final project proposal should be around 150-200 words and answer the first question: What career would you like to pursue and why? You can also begin to answer the remaining questions and treat this as a draft of your final project.

**Goal:**

Reflect upon your ultimate career goal and devise a plan for achieving it. If you’re still undecided, this doesn’t mean you have to lock yourself into a career path right now, but this assignment will get you thinking about what you might want to do. Also, this assignment will help you become familiar with Turnitin.com, which you will encounter in other classes at Indian Hills.

**Questions to Consider:**

- What career would you like to pursue and why?
- What courses will you need to take to reach your career goal? This will require a trip to Advising in the Bennett Building.
- What services available to students at Indian Hills will help you reach your career goal?
- Are there any student clubs or other extracurricular activities that could help you achieve your career goal?
- What are some ways you can promote yourself and your interests using social media?
- Will you be able to reach your ultimate career goal with an associate degree here at Indian Hills, or will you have to transfer to a 4-year institution after you get your associate’s degree?
- If you will need to transfer to a 4-year institution, which ones are best for your particular career goal? Which one seems like it would be the best fit and why?

**Note:** Your Final Project paper should be 600-800 words typed, double-spaced, with 12-point Times font.
