

### Faculty Tutorial: Adaptive Release

**Purpose:** To show faculty members how to release course content to students based on a "trigger" in MyHills.

From within a content area in MyHills, hover over the item for which you would like to set up "Adaptive Release," which will highlight it. Then, click the drop-down arrow that appears.

Note: This tutorial shows how to add "Adaptive Release" to a "Content Folder." However, you may apply "Adaptive Release" to any item within a course content area, including tests, assignments, files, images, and videos.

Learning Units 🛇	
Build Content 🗸 Assessme	nts v Tools v Part
Learning Unit 1           This folder contains	
Learning Unit 2	Edit Make Unavailable
	Adaptive Release

In the sub-menu that opens, click "Adaptive Release."

The "Adaptive Release" page will open. On the "Adaptive Release" page, you can create an "Adaptive Release Rule" for the content item you chose (above). The rule you create will be based on a number of different criteria or "triggers" that are available on this page.

### Date

There are several different triggers available for you to use when creating an "Adaptive Release Rule." The first is "Date." Use this trigger to limit student access to content based on date and time. Content may be displayed to students *after* a specific date and time, *until* a specific date and time, or *both*.

Note: Date availability restrictions can also be found on the content item's "Edit" page. It is recommended that you only set date/time restrictions on either the "Edit" page or the "Adaptive Release" page, NEVER both.

Check the appropriate box to select a "Display After" date and time, a "Display Until" date and time, or check both boxes to select a time frame. Then, use the *calendar* and *clock* icons to select dates and times.

Note: You may type the dates and times in the boxes provided instead of using the calendar and clock icons if you prefer. All times are Central Time.

	DATE	$\rightarrow$
	Setting a Date criterion for this item will restrict the dates and times of the visibility of this item.	
	Choose Date	\$
	✓ Display After 07/17/2024	5
	Enter dates as mm/dd/yyyy. Time may be entered in any increment.	5
	✓ Display Until 07/26/2024 11:59 PM	}
~	Enter dates as mm/dd/yyyy. Time may be entered in any increment.	ſ

### Membership

"Membership" criteria enable content to be displayed to one or more specific students and/or groups.

MEMBERSHIP	<	ĺ
This content item is visible to all users until a Membership criterion is created. Users must be specified in the Username list or must be in a selected Group.	{	3

The "Course Membership" pop-up window will open. Click "**Go**" to view a list of all students in your course. Check the box next to each student you would like to have access to the content.

Once you have selected the student(s), click "Submit."

Search	Username 🗸 Contai	ins v		60	
	FIRST NAME		USERNAME	EMAIL	ROLE
	Stuart	Dent	stuart_dent	teachme@indianhills.edu	Student

The username of each student who will have access to the content should now appear in the box next to "Username." Multiple students may be listed using a comma, with <u>no</u> spaces, between each student username. Example: stuart\_dent,janet\_learner.

Note: For information on setting up an accommodation test with extended time, please see the tutorial "Test Accommodation."

If you have created "Groups" in your course, they will appear in the "Items to Select" box. You may make content available to a group by clicking the name of the group in the "Items to Select" box. Then, click the right-facing arrow. The group(s) you selected will appear in the "Selected Items" box.

# Note: Groups will only appear in the "Items to Select" box if they have been created. For information on how to create groups, please see the tutorial "Create Groups in MyHills."

Use the "Select All" buttons to select all of the groups in a box. Use the "Invert Selection" buttons to deselect the group or groups that are selected in a box, and select the group or groups that are not selected in the same box.

## Note: You may select more than one group by holding down the "Ctrl" key on your keyboard while clicking your selections.

### Grade

"Grade" criteria make content accessible to students once there has been an attempt for a selected assessment, or a particular score/percentage has been achieved for the assessment.

First, select the drop-down arrow located to the right of "Select a Grade Center column." In the drop-down menu that appears, select the trigger assessment for which the grade criterion must be met in order to access the content item.

G	IRADE	
	This content item is visible to all users until a Grade criterion is created. Possible points f brackets beside the column name. The score entered must be numeric.	ior a G
	Select a Grade Center column	$\geq$

	Assignment - Journal Entry[100]	1
	Assignment - LU02: Reflection Essay[50]	ent, 🍾
	Assignment - Radiology Essay[24]	3
L	Assignment Research Pap x[100]	

If students are only required to have an attempt for the selected trigger in order to access the content item, keep the radio button next to "User has at least one attempt for this item" selected. For example, students must have at least one attempt for the "LUO2: Reflection Essay," which is the trigger, for the content folder "Learning Unit 3" to open.

GRADE
This content item is visible to all users until a Grade criterion is created. Possible points for a Grade C brackets beside the column name. The score entered must be numeric.

You can also require students to achieve a particular grade on the selected trigger in order for the content item to open. Select the radio button next to "Score" or "Percent" to select the type of grade that is required. Then, click the drop-down arrow next to "Less than or equal to."

# Note: When you select "Score" or "Percent," the radio button next to "User has at least one attempt for this item" will no longer be selected.

In the menu that opens, you can select "Less than or equal to," "Greater than or equal to," or "Equal to." Then, type the numeric value of the "Score" or "Percent" in the provided box.

You may also require that students receive a grade between two values. Select "Score" or "Percent" then, type the values in the boxes provided.

### **Review Status**

"Review Status" allows the selected content to be released based on a student's review of another item in your course. Click "**Browse...**" to locate the item that you would like students to review.

REVIEW STATUS	
All users can see this content item until a Review Status criterion is created. Selecting an item allows users to mark that item as reviewed.	
NOTE: Adding an Adaptive Release rule with review status overrides any existing Test Availability Exception setting for this content item.	5
Select an item	5

have a second and the second s	

A pop-up window will open. Select the trigger item that you would like students to review before the content item is made available. For example, you may require that students review the Syllabus before making Learning Unit 1 available.

The trigger item you chose for students to review will appear in the box next to "Select an item."

Note: Students must check a box confirming that they reviewed the trigger item in order for the selected content item to become available.
