IPEDS graduation and transfer-out rates cohort:

This annual component of IPEDS was added in 1997 to help institutions satisfy the requirements of the Student Right-to-Know legislation. Graduation rates data are collected on the number of students entering the institution as full-time, first-time, degree/certificate-seeking undergraduate students in a particular year (cohort, the number completing their program within 150 percent of normal time to completion; the number that transfer to other institutions. The graduation rate is calculated as the total number of completers within 150% of normal time divided by the revised adjusted cohort (the result of removing allowable exclusions from the initial full-time, first-time, degree/certificate-seeking undergraduate cohort).

VFA (Voluntary Framework of Accountability) credential seeking cohort:

The VFA is the principal accountability framework for community colleges with measures defined to encompass the full breadth of the community college mission and the diversity of students' goals and educational experiences. The credential seeking cohort is defined as fall entering students who have earned a minimum of 12 credits by the end of year two.
