

## IHCC Master Graduate Listing by Program 5-Year Mean, 2016 - 2020

At IHCC, programs have varying starting terms. This makes term-by-term comparisons of graduates complicated. Programs have access to their historic term-by-term graduation counts and also demographic information concerning their graduates in order to discuss policies and procedures that may impact graduation overall and by individual groups. Traditionally, spring term graduation has been the largest overall, with many programs completing at the end of this timeframe. Also, many programs have their students recognized at this spring commencement, knowing they will be finishing their studies in the summer term. Fall and winter commencements are also held to recognize students completing their programs at these times. The following tables list programs with a 5-year mean number of graduates greater than or equal to 5 students.

Title	Winter 5-Year Mean
Arts & Sciences-Associate of Arts, Associate of Science-Ottumwa	49
Arts & Sciences-Associate of Arts, Associate of Science-Centerville	7
