8TH GRADE DAY

Ottumwa Campus – 9:45am-12:40pm

NOV. 21

8th grade students begin to explore their future career paths in a hands-on, engaging way. During this day, students participate in a variety of sessions led by professionals from the local community as well as instructors from IHCC. These sessions introduce students to a wide range of career options, from skilled trades and healthcare to technology, business, and more. Students not only learn about what different careers involve, but also gain insight into the education and skills required for each path. They are encouraged to start thinking about their interests and strengths, and how those can guide their choices in high school and beyond.

10th grade students can explore specialized academy options available for their junior and senior years. These academies offer focused coursework in areas such as health, computers, welding, auto technology, machining, business, and performing arts. Completion of an academy can lead to an Associate of Applied Science (A.A.S.) or Associate of Arts (A.A.) degree. Academies give students a head start on college and careers by offering early college credit, hands-on learning, and real-world experience. They help students save money, explore career paths, and graduate with valuable skills or even a degree from IHCC.
