

Cybersecurity & Systems Administration Program

MOBILE ESCAPE ROOM

Are you ready for an adventure that challenges your problem-solving skills and opens the door to a world of digital discovery—even if technology isn't your usual thing? Our mobile escape room brings the thrill of interactive puzzles right to your location, offering a unique experience that blends fun with learning and invites everyone to explore new ideas.

Engaging Challenges:

Participants will tackle puzzles based on real-world cybersecurity principles, providing a hands-on glimpse into the field.

Team Collaboration:

Work together with peers to solve problems, enhancing teamwork and communication skills.

Mobile Convenience:

Our escape room is designed to travel, making it accessible to various schools and events in the area.

About Our Cybersecurity & Systems Administration Program:

Indian Hills Community College offers a comprehensive Associate of Applied Science (A.A.S.) degree in Cybersecurity & Systems Administration. This program provides hands-on training with state-of-the-art equipment, focusing on maintaining computer systems and networks used in today's business and industry.

Ottumwa Main Campus | 7 Terms (21 Months) | Fall Term Entry

UPCOMING WEBINARS FOR EDUCATORS

We are hosting introductory webinars for high school administrators and teachers to showcase how this mobile escape room can benefit your students and spark interest in cybersecurity careers. Dates and times to be announced.
